ODYS: the test app, in its new design

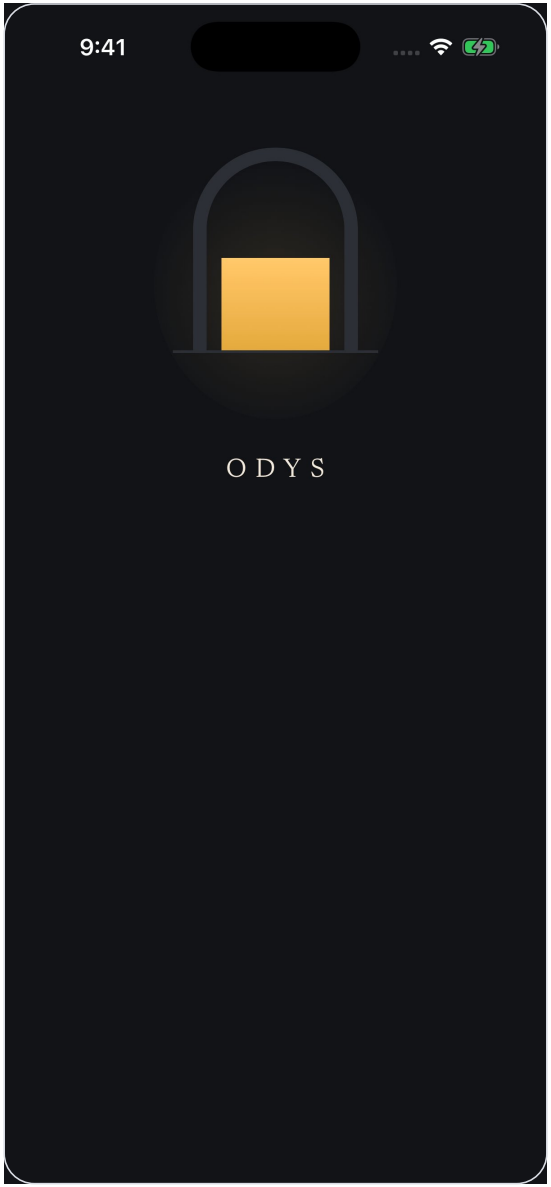

14 screens, in the order you'd see them

An iPhone app that plans a day out in London around how you want it to feel, not a list of famous sights.
You answer a few quick questions and react to some places you know. It plans a day with a map, and you rate each stop after you've been. More questions, all optional, come after the first plan.
These are screenshots from a test build with sample data. Nothing is live yet.

Your feedback (about 10 minutes)

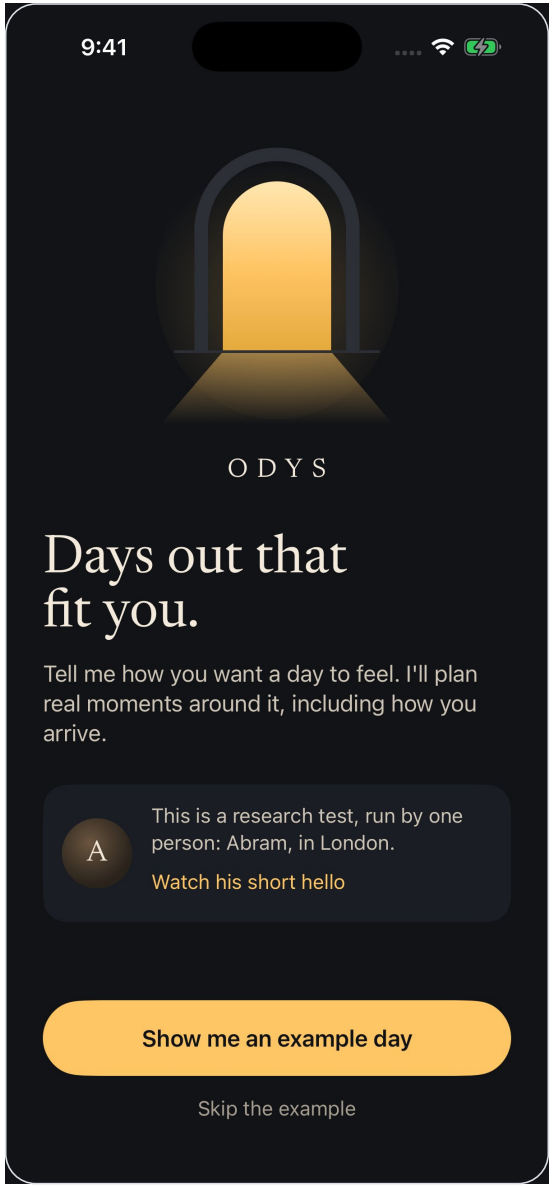

1. Is there a screen that would make you stop or give up? Which one?
2. Is anything confusing or unclear? Give the screen number.
3. Is there anything you'd change, add or remove?
4. Would you want to try it for a real day out? Why, or why not?

Reply to Abram with the screen numbers. Short answers are best, and honest ones help most, including "this is boring".

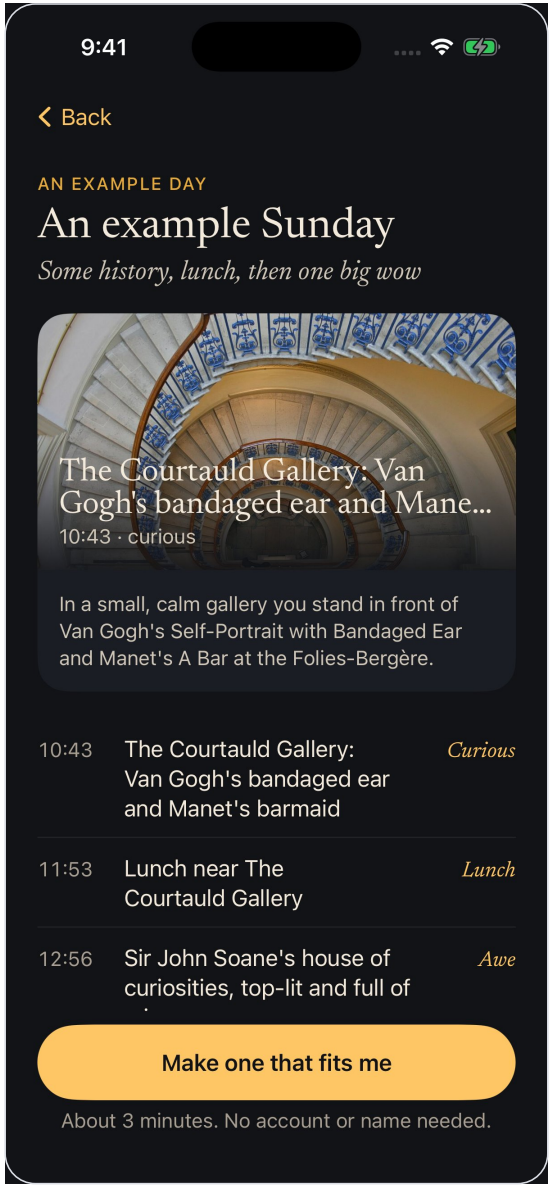

1a Welcome: the arch lighting up

On first opening, light rises in the arch and spills out in front (about a second; a tap skips it).

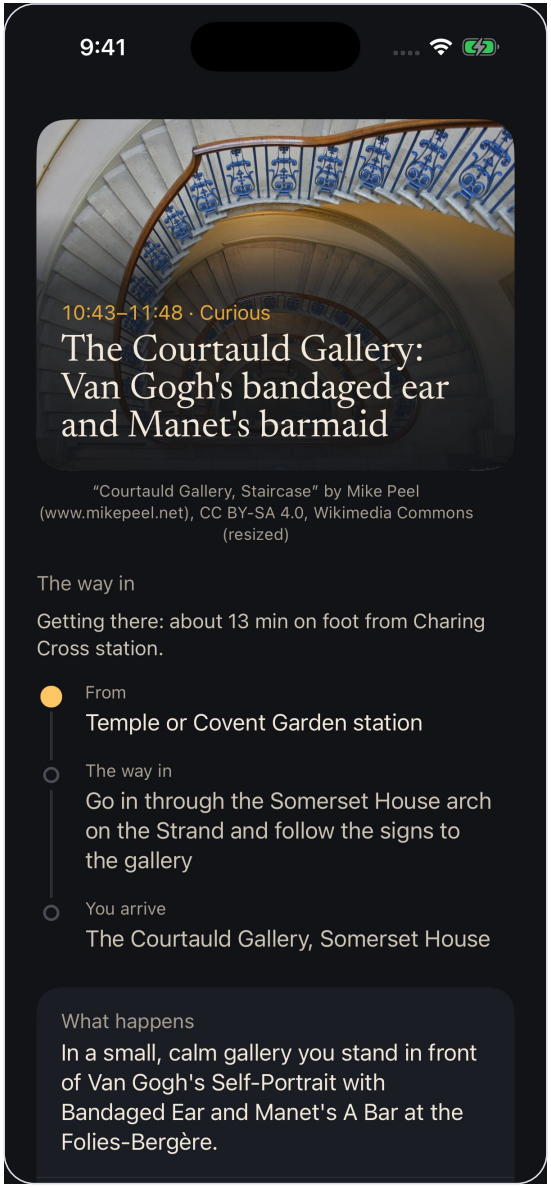

1b Welcome

ODYS: days out that fit you, and who runs this test.

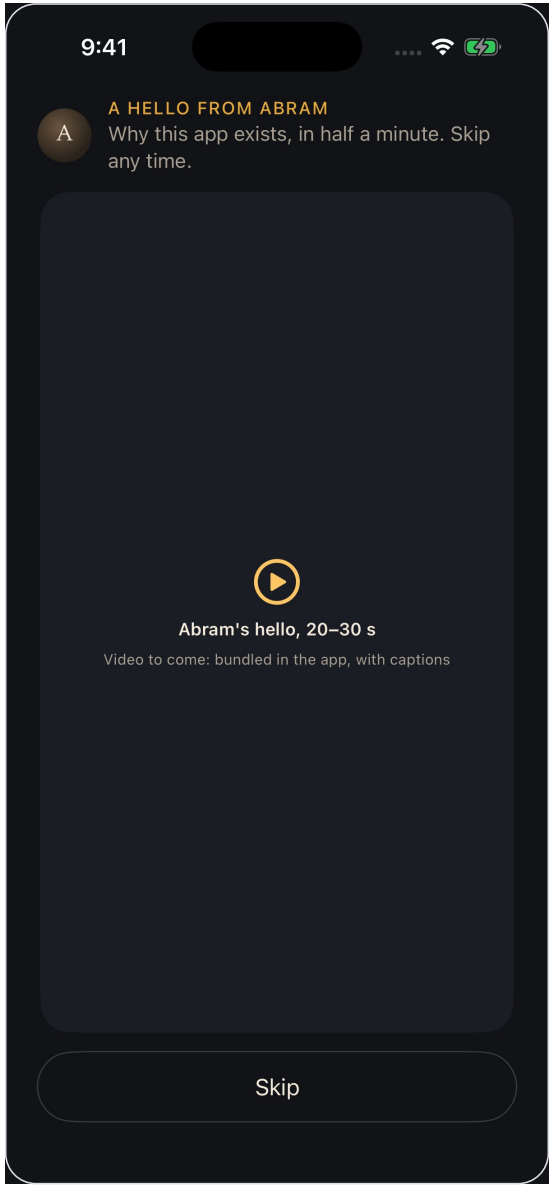

2a An example day

What a plan looks like, before any question: one stop as a picture, then the day. Not planned for you.

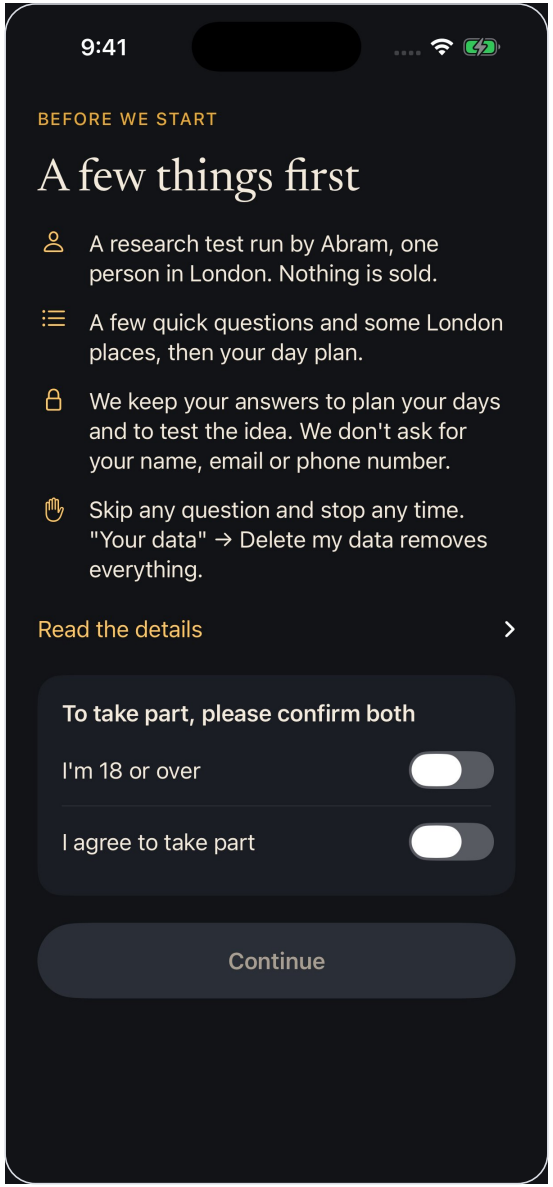

2b An example day: one full card

Further down the same screen: one stop's full card, so the special parts show before any question.

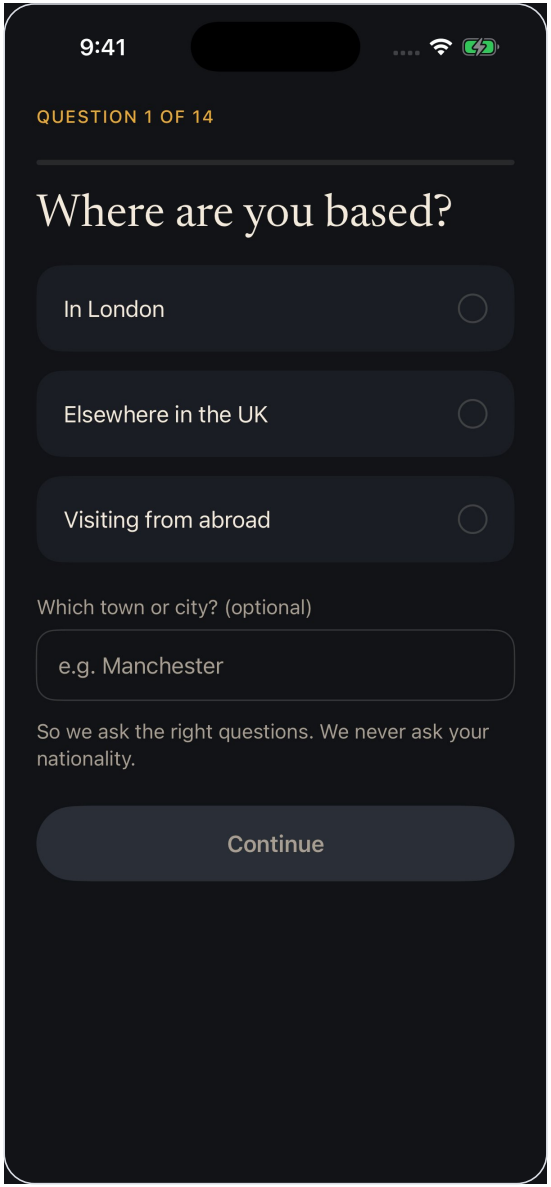

2c A hello from Abram

A 20–30 s video, bundled in the app, with captions. Skip, or Continue when it ends. (Placeholder until it's recorded.)

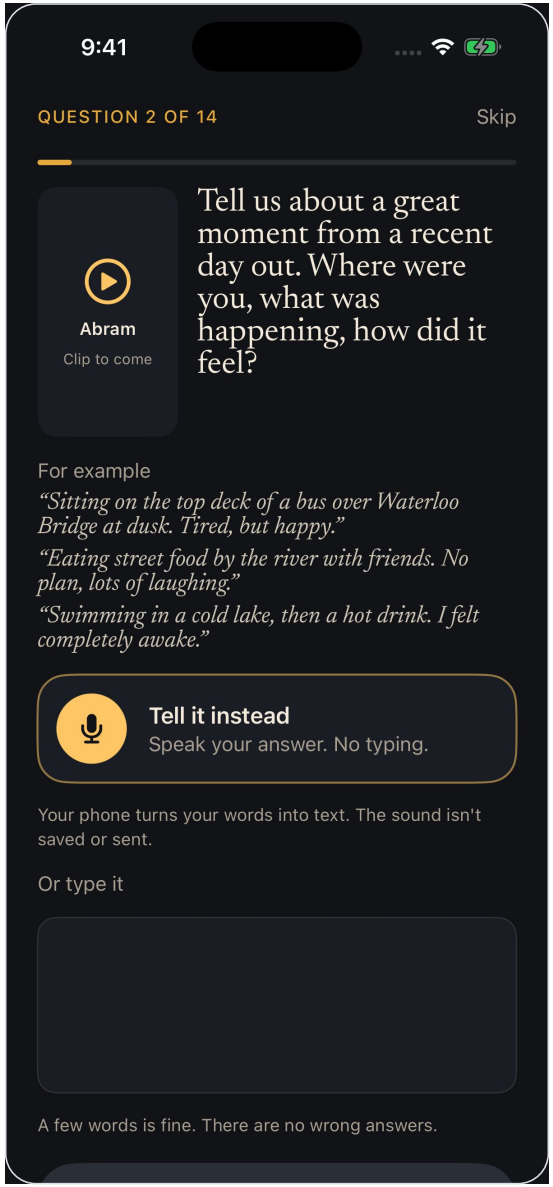

3 Before we start

A short summary, the two required choices in a box, and the details folded away.

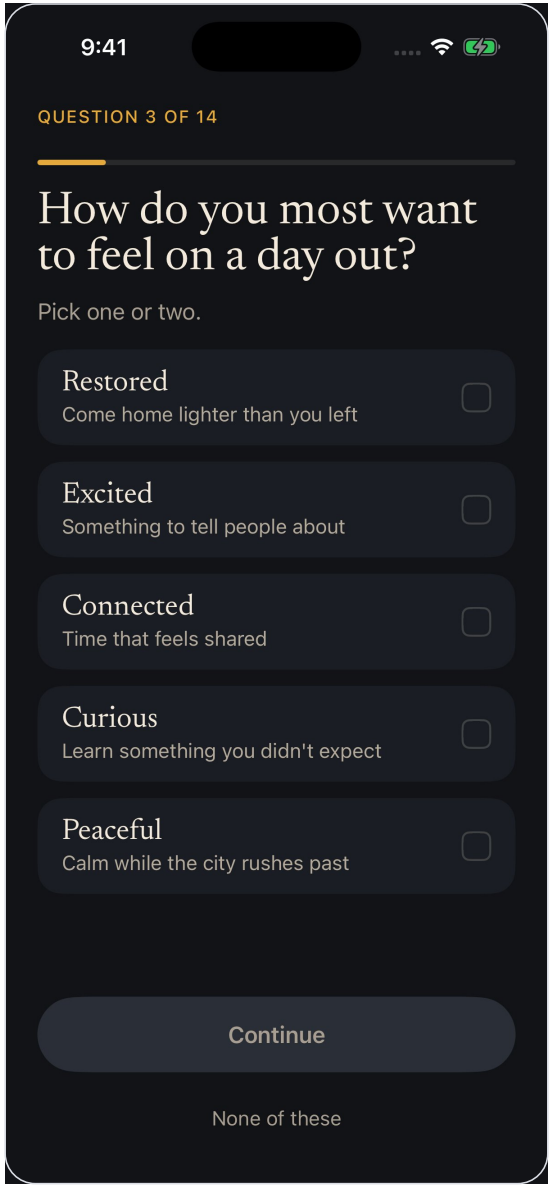

3b Where you're based

London, elsewhere in the UK, or visiting from abroad, and a town or city if they like. Never nationality.

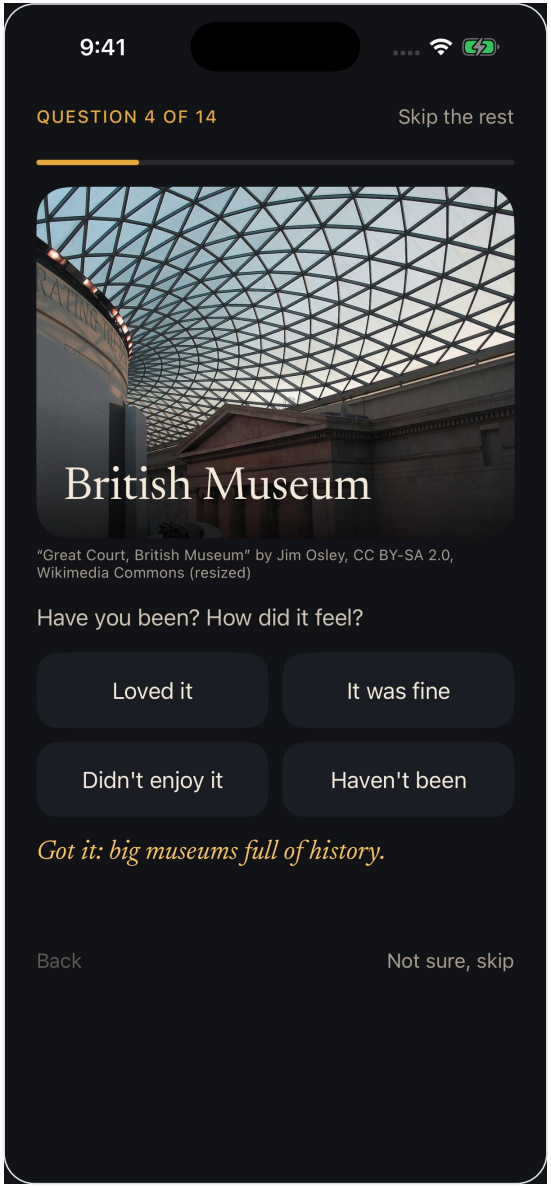

4 A great moment

Abram asks it in a small video tile (placeholder until recorded). "Tell it instead" to speak, or type, or skip.

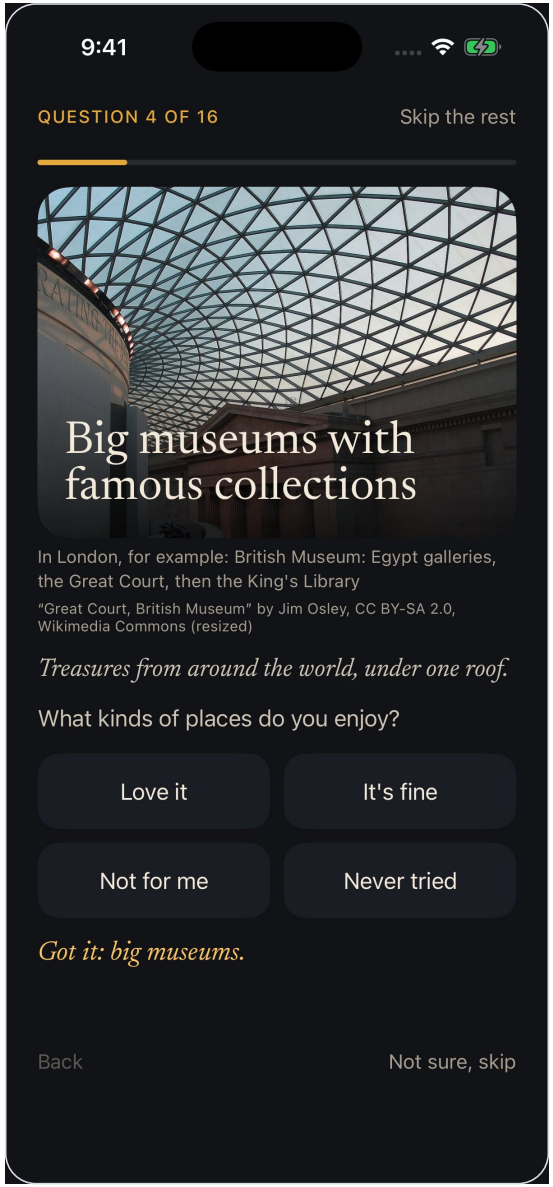

5 How you want to feel

Restored, excited, connected, curious or peaceful: pick one or two. "None of these" is a quiet link.

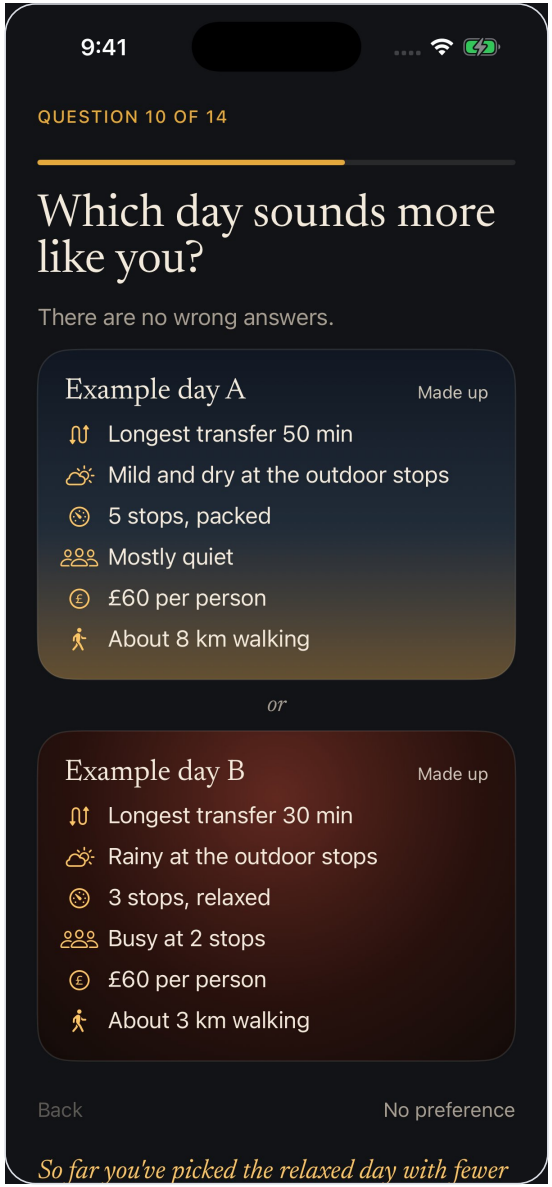

6 Places you've been

6 London places, one at a time, with a photo. A short line reacts to the answer ("Got it: …"), only from what was answered.

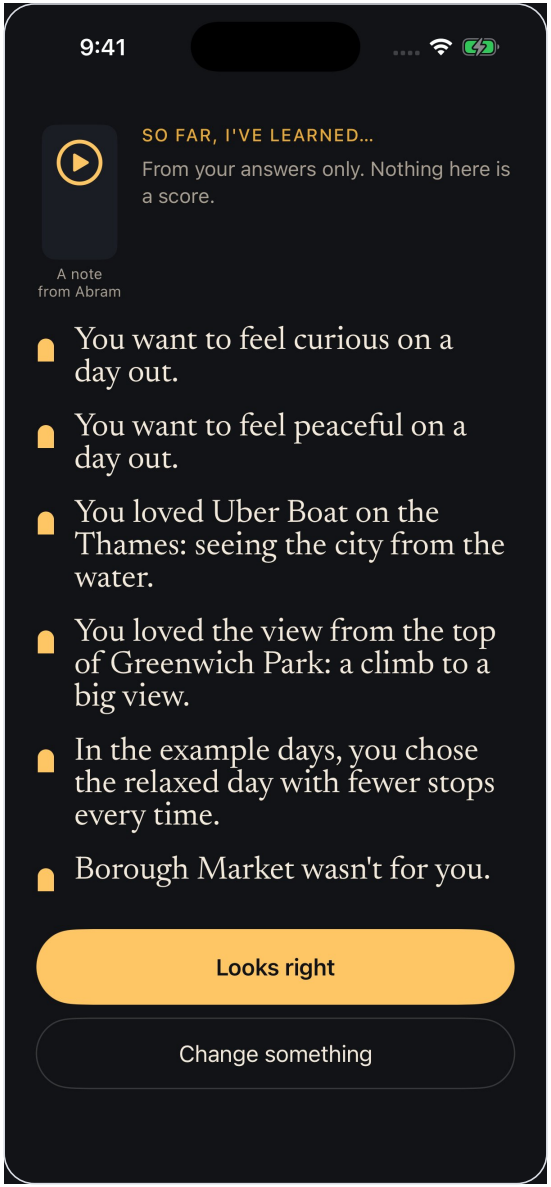

6b Kinds of places (visitors)

Visitors from abroad only, instead of 6: 8 kinds of places with a London example. "Never tried" asks if they'd like to.

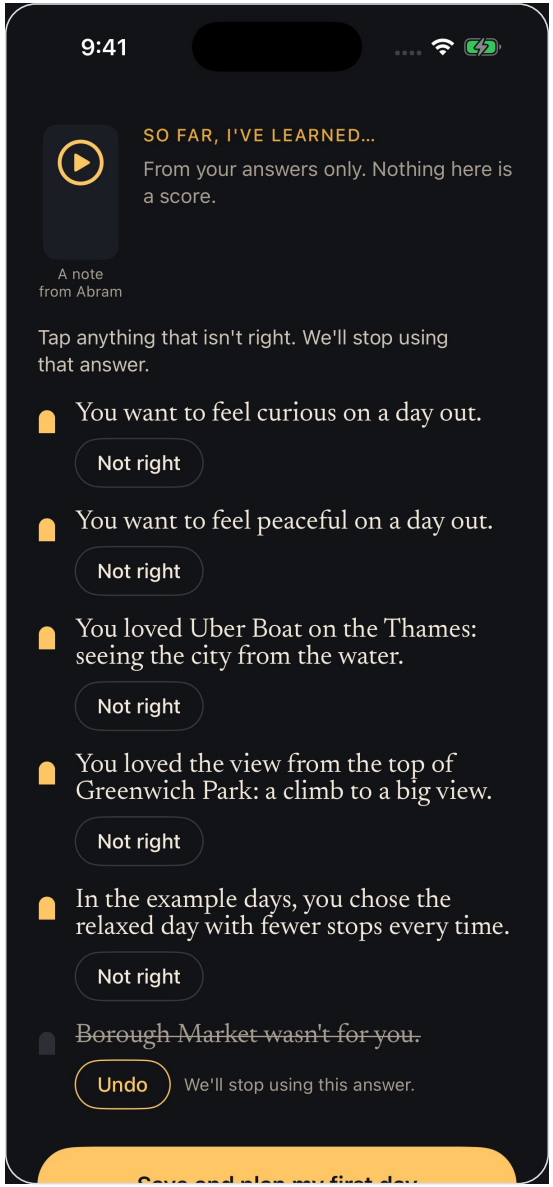

7 This or that

"There are no wrong answers." Two made-up days with all six details: pick one, or "No preference".

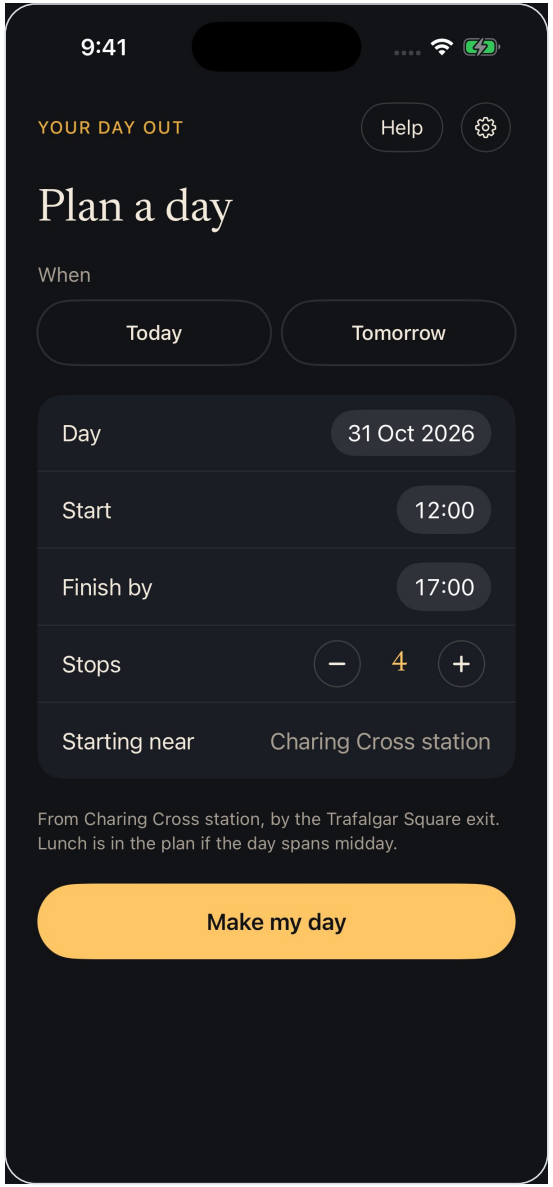

7b So far, I've learned…

Your own answers in plain words, no scores, with a small note from Abram. Looks right, or Change something.

7c So far: changing something

"Not right" on any line (Undo to take it back). It's stored, and that answer stops counting.

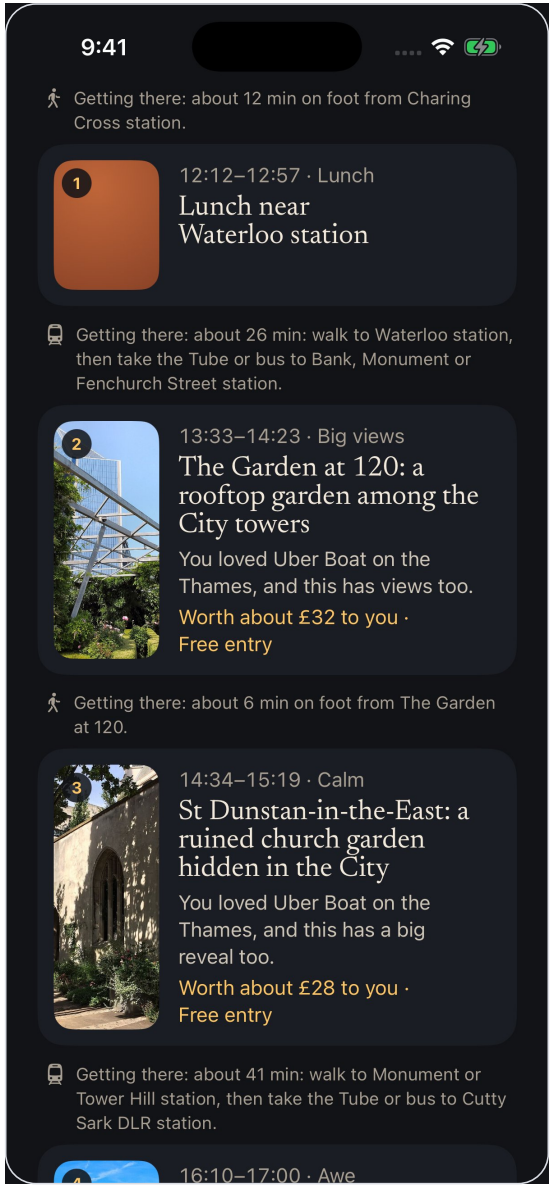

8 Plan a day

Next Saturday, 12:00–17:00, already filled in, or Today / Tomorrow. One tap makes the plan.

9a Your day

How the day should feel, the numbers, and "How the day moves": a word for each stop, higher where we think you'll enjoy it more.

9b Your day: the stops

Further down: each stop with its photo, time, reason and worth to you, then "Start the day".

9c Your day: the reveal, part-way

Instead of a spinner: the headline settles, the curve draws and each stop appears (2.6 s, once).

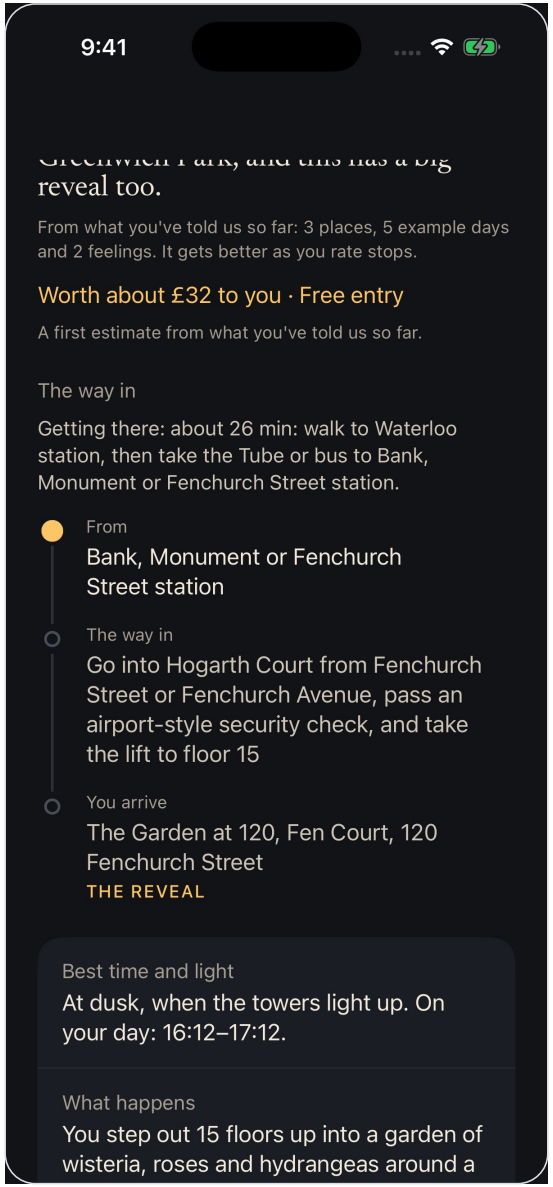

9d Your day, on the map

The same plan on a real map, with numbered pins.

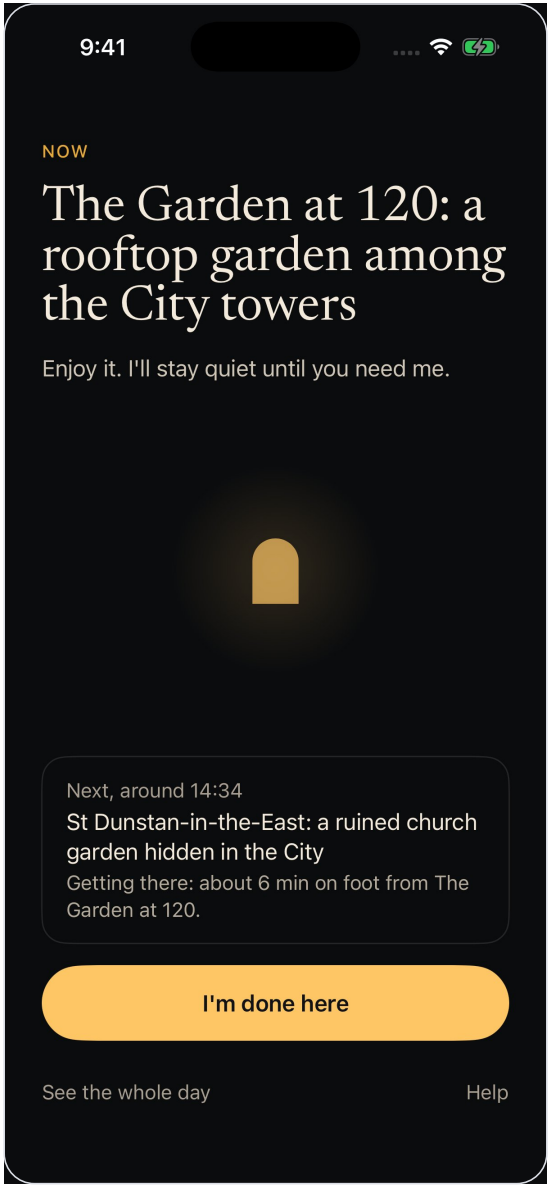

10 A stop

The photo full-bleed, with the time, the kind of moment and the title; why we picked it and its worth to you.

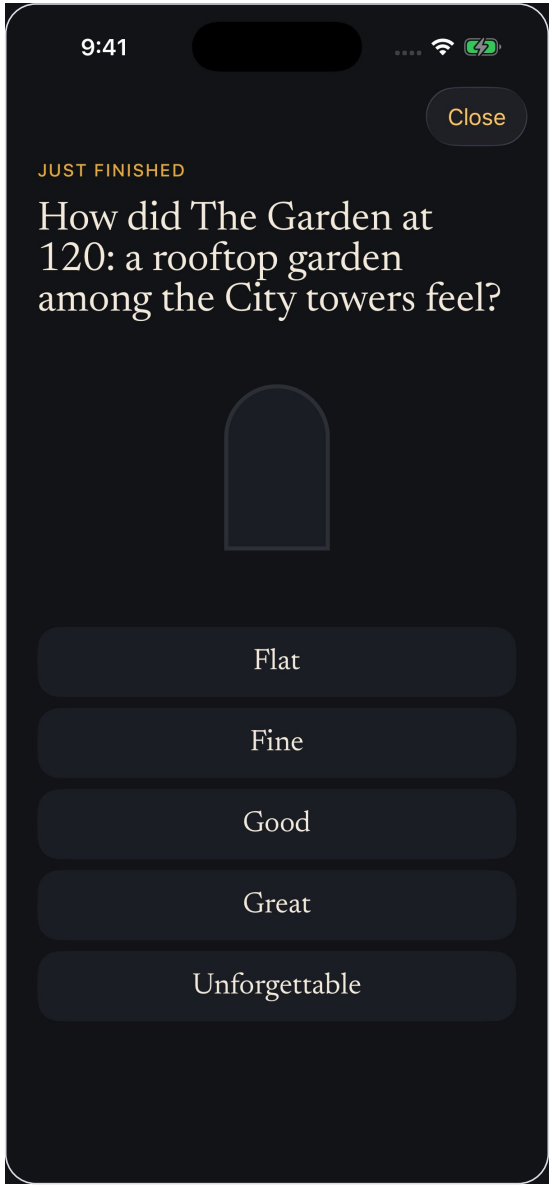

10a A stop: the way in

Further down: the way in as a path you can tap along, "The reveal" where the arrival is the moment, then the details.

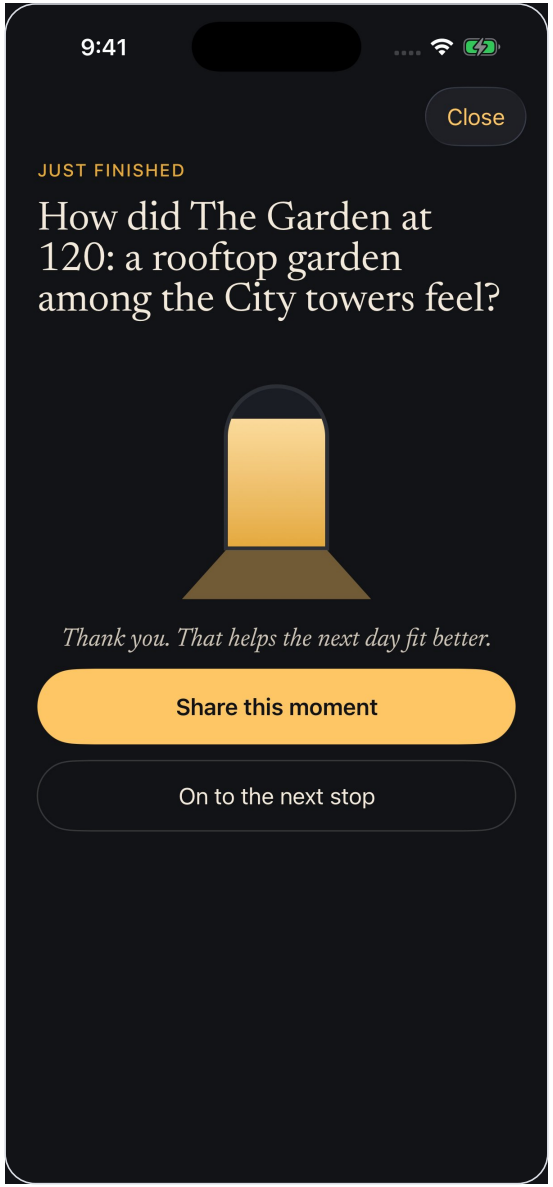

10b Now (new)

While you're out: the stop you're at, "I'll stay quiet until you need me", what's next, and "I'm done here".

11 Rating

After the visit: Flat, Fine, Good, Great or Unforgettable. The arch fills with light to the word.

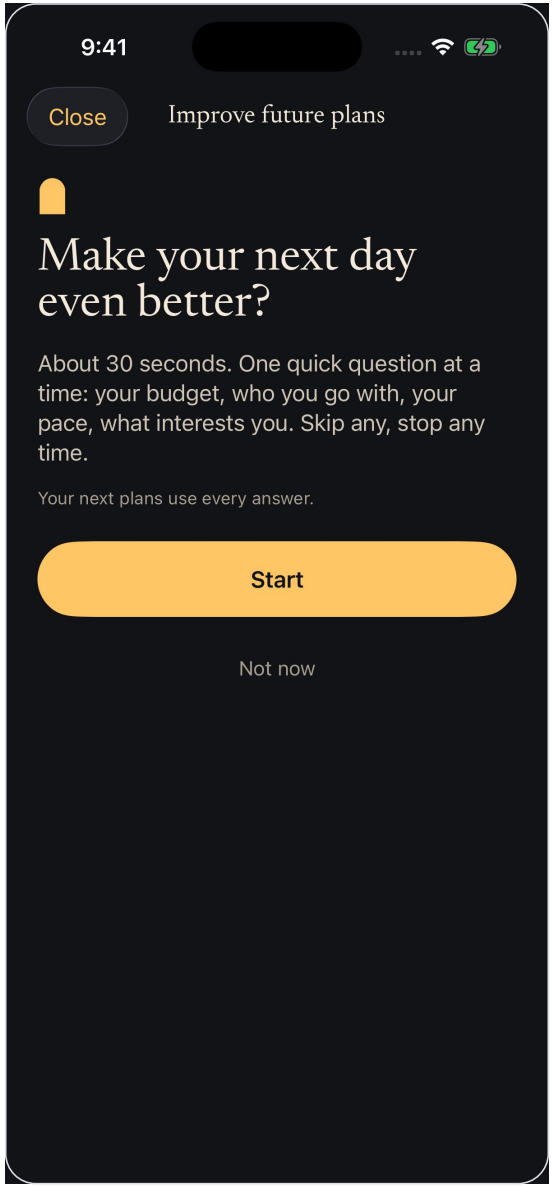

11a Rating: thank you

After saving: a thank-you, "Share this moment" and "On to the next stop".

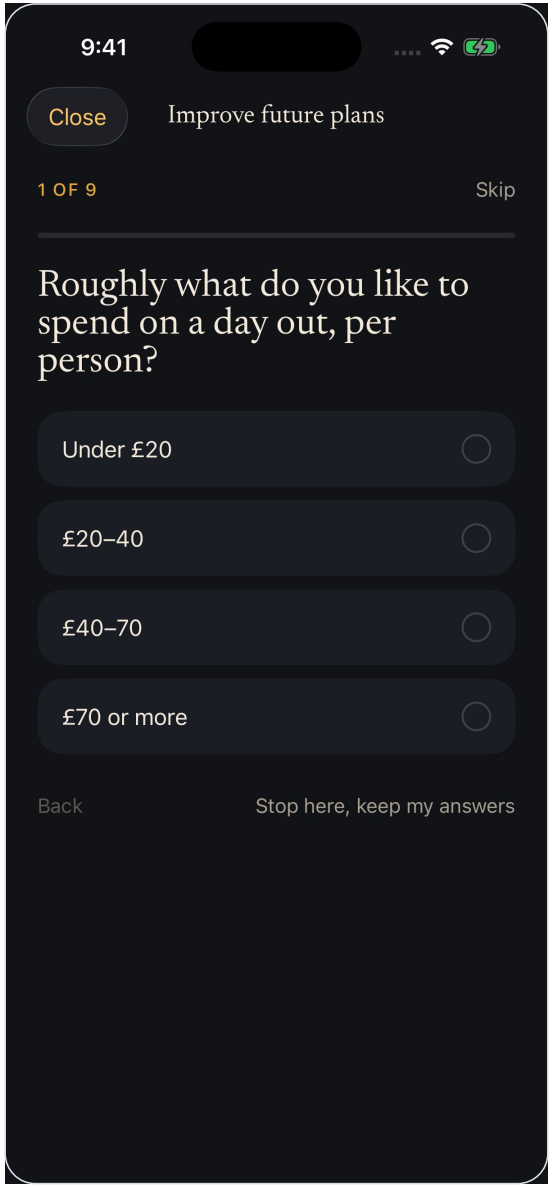

11b Share card

Your own rating and your own words, the photo, "Planned with ODYS". Never what we estimated it's worth. No rewards.

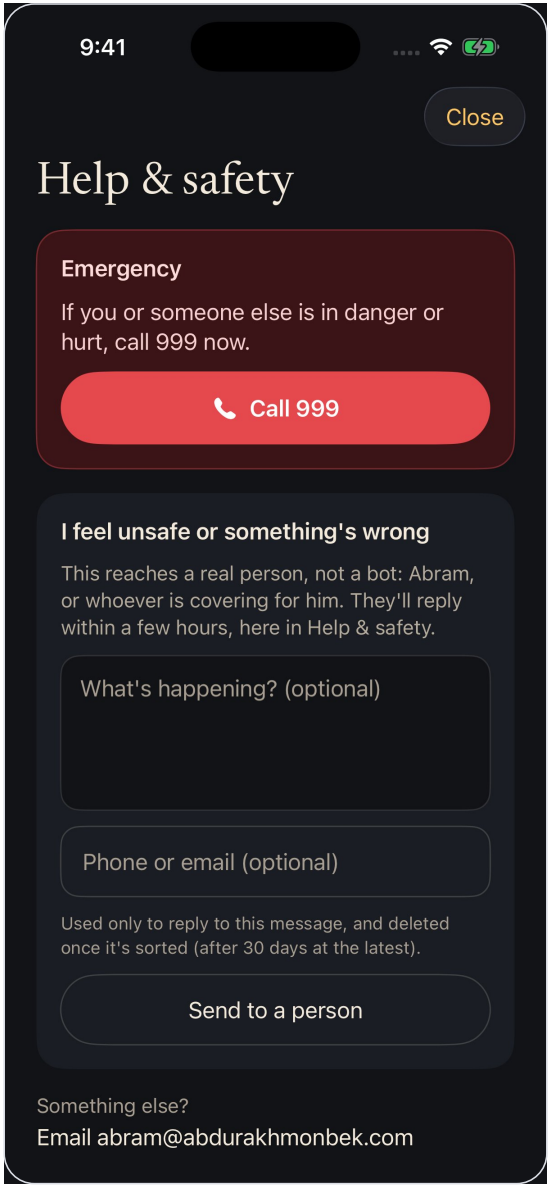

12a Improve future plans

"Make your next day even better?" Offered once a stop is rated; before that, a quiet link.

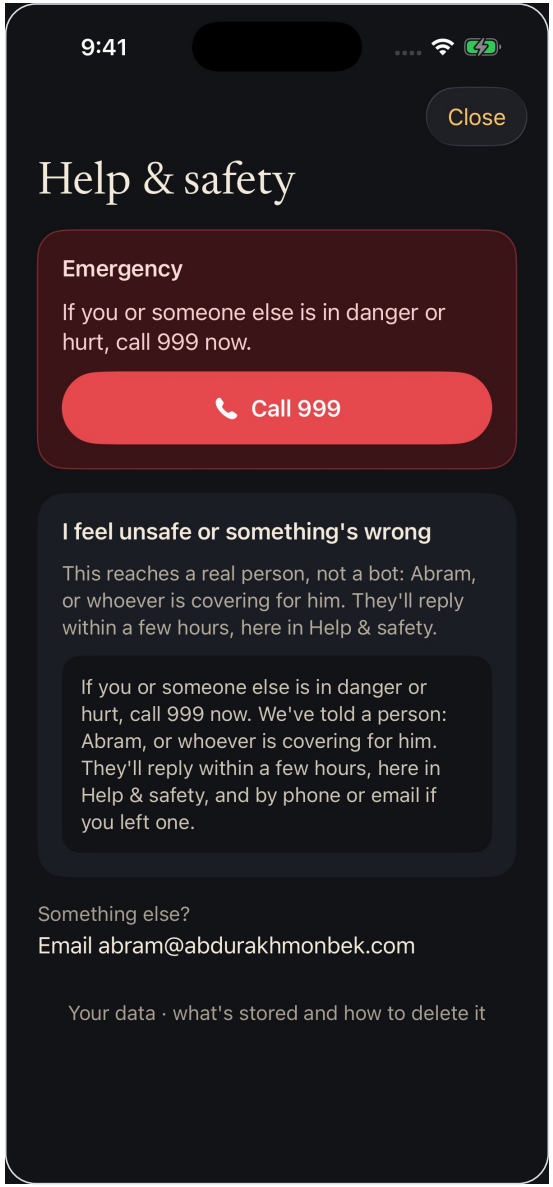

12b One question at a time

Tap an answer and the next question comes. Skip any, stop any time.

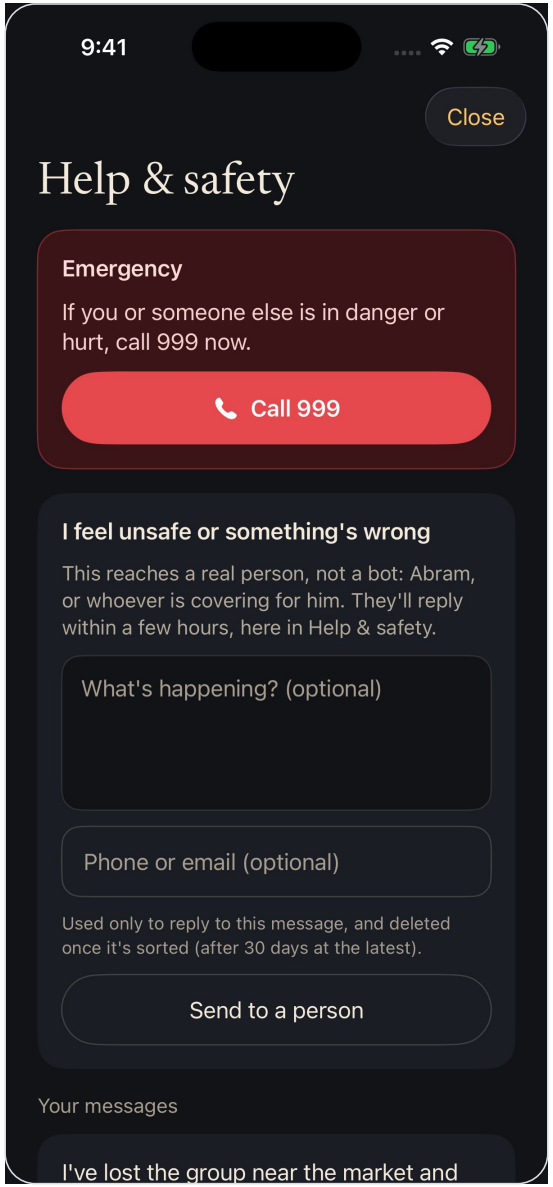

13a Help & safety

Emergency: call 999, kept separate from "I feel unsafe or something's wrong", which reaches a person.

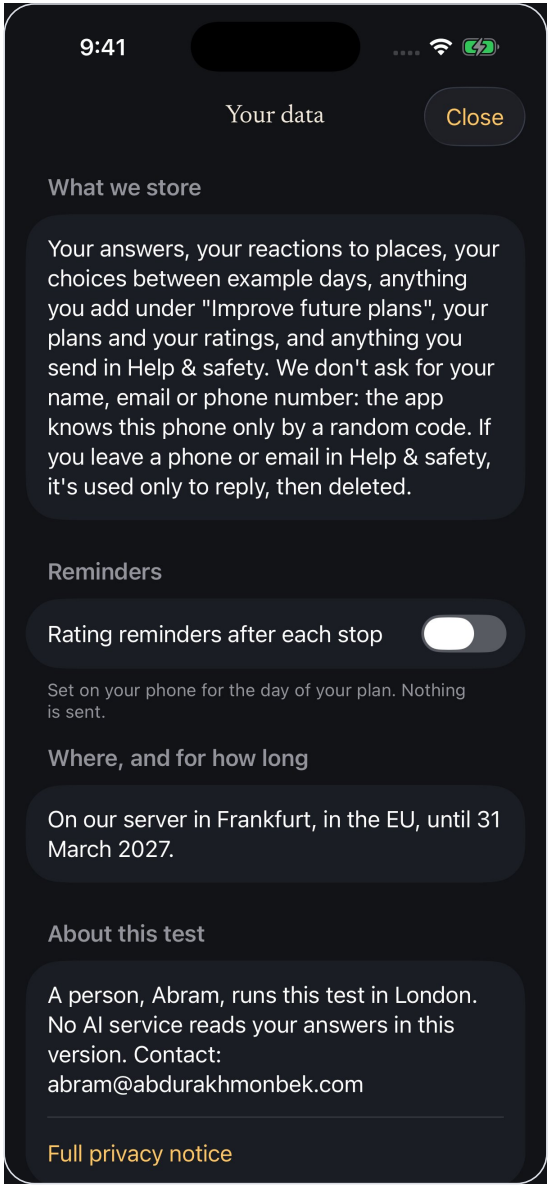

13b Help & safety: just sent

The automatic answer: 999 first, then who replies (Abram, or whoever covers) and that it's within a few hours.

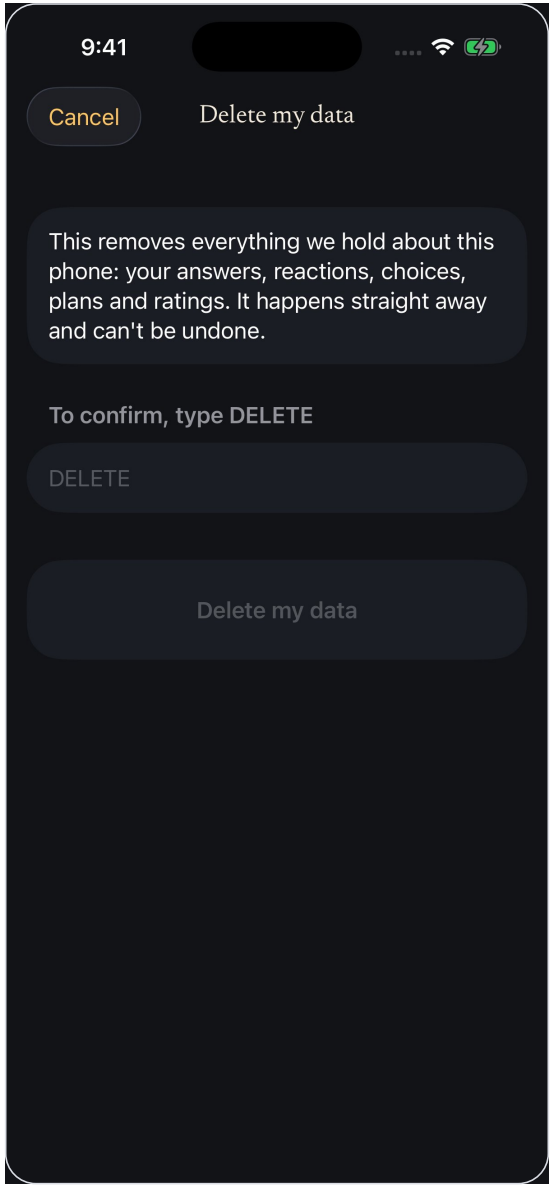

13c Help & safety: a reply

The reply shows here, under your message, and Help gets a dot. Replies come within a few hours.

14a Your data

What's stored, where and for how long; rating reminders on or off.

14b Delete my data

Type DELETE to confirm. It can't be undone.
