Days out: the test app, after the screen review

14 screens, in the order you'd see them

An iPhone app that plans a day out in London around how you want it to feel, not a list of famous sights.
You answer a few quick questions and react to some places you know. It plans a day with a map, and you rate each stop after you've been. More questions, all optional, come after the first plan.
These are screenshots from a test build with sample data. Nothing is live yet.

Your feedback (about 10 minutes)

1. Is there a screen that would make you stop or give up? Which one?
2. Is anything confusing or unclear? Give the screen number.
3. Is there anything you'd change, add or remove?
4. Would you want to try it for a real day out? Why, or why not?

Reply to Abram with the screen numbers. Short answers are best, and honest ones help most, including "this is boring".

The same plan without the map, with the travel between stops. "Regenerate plan" is further down.
